

# Introduction

---

WAVES Aircon provides a comprehensive range of custom-made Airside products. As one of the largest HVAC airside products manufacturer in India, Waves Aircon is committed to the sustainable manufacturing of products designed to increase the efficiency of HVAC systems and have been devoted to the betterment of the industry & people.

Waves ductworks are manufactured to SMACNA and other relevant standards and ensure that each piece of ducts is thoroughly checked at every stage of production for its quality.

Manufacturing Facility located at Bhiwadi (Rajasthan) spread over 150000 Sqft of area is equipped to operate with a blend of Fully and semi automated machinery which enables us to handle both large-scale and minor jobs equally efficiently with consistency in its quality. The duct with appropriate markings is loaded and dispatched from the factory.
